John Tran
  o  John C. Tran obtained his B.Sci. and Ph.D. in Chemistry from Dalhousie University, Canada. During his undergraduate studies, he was working with Prof. Louis Ramaley in developing fiber optic sensors and with Prof. Robert Guy on passive air samplers of volatile pollutants. He obtained his Ph.D. in Prof. Alan Doucette's lab where he designed and developed biomolecule separation devices, including the GELFrEE apparatus, tailored for mass spectrometry. In 2008, he joined Prof. Neil Kelleher's lab as a post-doctoral associate, and was involved in technology developments specifically for Top Down proteomics. In 2010, he began working in the PCE as a research associate and where he continued to work on improving workflows prior to mass spectrometric analysis for biological samples. He is currently a staff scientist at Genentech.
